

Machine Description

The RW Transplanter features cutting-edge electronics and wireless technology, delivering exceptional flexibility and efficiency. Its intuitive touch-screen interface streamlines operation, while rapid plug tray and finish container changeovers can be completed in just minutes. Designed to maximize planting throughput, this innovative transplanter ensures seamless transitions and enhanced productivity for any horticultural operation.

Features

- Independent finger movement
- Wireless communication
- Up to 16 fingers
- Max. finger spread 1000 mm (39")
- Pinching spade gripper design
- User friendly graphical user interface
- Electronic planting depth and plug tray height adjustment

**Example rate depends on plug tray and finish container specs.*

Specifications:	
Finish Containers	Flats, Shuttle Trays, & Individual Pots 6" and above.
Plug Trays	From 512 to 50 Cell Trays
Transplant Speed	- *Up to 14,000 plugs/hour - Standard Model - *Up to 18,000 plugs/hour Continuous Flat Model
Electrical Requirements	230 VAC 3 Phase, 8 Amps
Air Requirements	6 CFM
