

Machine Description

The RW-1500 Transplanter combines advanced electronics and wireless technology to deliver unmatched flexibility and efficiency. Its intuitive touch-screen interface simplifies operation, while its innovative design enables quick plug tray and finish container changeovers in just minutes. This transplanter significantly increases planting throughput, making it an ideal solution for streamlined and productive planting processes.

Features

- Independent finger movement
- Wireless communication
- Up to 24 fingers
- Max. finger spread 1460 mm (57.5")
- Pinching spade gripper design does not require push-up pins
- User friendly graphical touch screen controls
- Electronic planting depth and plug tray height adjustment

**Example rate depends on plug tray and finish container specs.*

Specifications:	
Finish Containers	Flats, Shuttle Trays, & Individual Pots 6" and above.
Plug Trays	From 512 to 50 Cell Trays
Transplant Speed	*Up to 24,000 plugs/hour
Electrical Requirements	230 VAC 3 Phase, 16 Amps
Air Requirements	6 CFM
