Specifications:

Finish Containers:

Flats, shuttle trays (lengthwise or sideways) and individual pots 6" in diameter and above

Plug Trays:

From 288 to 50 cell trays

Transplant speed:

Up to 61,000 plugs/hour **

Electrical Requirements:

230 VAC 3 Phase, 20 Amps

Air Requirements: 10 CFM

Features:

- * Double boom
- * Independent finger movement
- * Wireless communication
- * Up to 72 fingers
- * Max. usable finger spread 81"
- * Planting fingers pull from 3 plug trays lengthwise or 5 widthwise at a time
- * Pinching spade gripper design does not require push-up pins
- * User-friendly graphical touch-screen control
- * Electronic planting depth and plug tray height adjustment

** Example: rate depends on plug tray and finish container specs.

The RW 2100 Twin Transplanter features a double planting finger gantry and state of the art electronics with wireless technology to dramatically improve flexibility, provide intuitive user interface touch screen functionality, and increase planting throughput. This innovative design allows plug tray and finish container changeovers to be accomplished in only a few minutes. Depending on configuration, the machine can plant up to 1,700 flats per hour (288 plugs into 606 flats).
