Electrical Requirements:

230 VAC 3 Phase, 3 A

Features:

- * Variable Belt Speed
- * Pre-wired for integration to flat filler or other production equipment
- * Adjustable tray denester
- * Electronic photo eye control

The Multi-Stack Tray Dispenser automatically dispenses most common propagation and plug trays. It can be used as a stand-alone unit or can be fully integrated into production lines of all types. This "multi-stack" version automatically loads stacks via an upper conveyor belt and returns the dispensed tray via a lower belt. All units are adjustable to fit many trays. The dispensing magazine and separation mechanism are user-adjustable to accommodate different tray sizes.
