Soil Handling

Mixing Lines

A modular system for soil mixing

BENEFITS:

- Available in various sizes
- Manual or Touch screen controls available
- Inline Mixing
- Modular Configuration
- Low Maintenance
- For the mixing of raw materials with additives
- Gentle on materials
- Accurate and excellent mixing capabilities
- Available in various voltages

The Logitec Plus mixing lines are modular systems capable of mixing up to 4 raw materials with up to 6 additives.

The line is compatible with almost any filler and/or potting machine and all the Logitec machines like the DB40, CM100, CM200 and MBB100.

The Logitec Mixing drum ensures a perfectly mixed substrate. Thanks to the special mixing blades the ingredients are mixed without affecting the materials.

The Mixing lines are available in various sizes, ranging from 15m³ per hour till 90m³ per hour and are offered in manual versions and fully automatic versions with touchscreen controls

The Logitec Plus Mixing Lines can process a wide variety of products including: White and Black peat, Compost, Sand, Clay, Perlite, Vermiculite, Osmocote, Lime, Both Artificial and Organic Fertilizers.

OPTIONS:

- Water dosing system
- Volume measuring system
- Vibrating units in various sizes to dose your additives
- Various voltages
- UL/CSA version
- Various sized hoppers and belts

Small and Medium Sized Hoppers

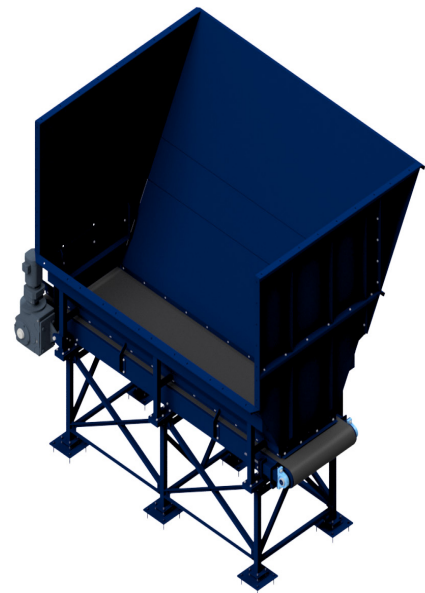

FEATURES

- Available in many different sizes
- Custom made hoppers to process different types of materials
- Available for various voltages
- Aluminum or steel frames
- PVC, PU or rubber belts
- Can be equipped with Wooler
- Can be integrated into existing mixing or product lines

Large Sized Hoppers

FEATURES

- Available in many different sizes
- Custom made
- Available for various voltages
- Steel frame
- PVC, PU or rubber belts
- Can be equipped with belt slip control
- Can be equipped with wooler
- Can be integrated into existing mixing or product lines

FEATURES

- Available in various sizes
- Stainless Steel
- Accurate dosing
- Speed regulates
- Layer height is adjustable
- Sustainable for many different kinds of dry additives
- Can be integrated in mixing line or used standalone
- Gentle on products
- Control can be integrated in control cabinet

Crate Tipper

FEATURES

- For tipping cubic meter crates with soil into a hopper
- Suitable for various materials
- Can be integrated in soil handling line or mixing line
- Manual dosing controls
- Available in various voltages

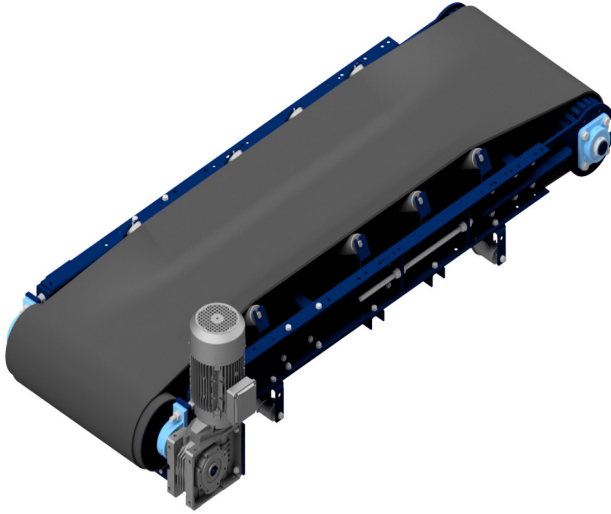

Conveyor Belts ECO Style

FEATURES

- Available in various widths and lengths
- Can be equipped with scrapers
- Can be equipped with belt slip control
- Regular or troughed belts
- Rubber belts with steel frames
- Economic design
- Easy to maintain
- Available in various voltages

Conveyor Belts VMB Style

FEATURES

- Available in various widths and lengths
- Can be equipped with scrapers
- Can be equipped with belt slip control
- Regular or troughed belts
- Rubber or PVC (PU) belts
- Heavy duty design
- Easy to maintain
- Available in various voltages
