

Mayer - EM 6002

With the Mayer EM 6002 Soil Mixer, the substrate can be moistened and fertilized during the mixing process.

The soil hopper can be loaded from three sides depending on position (manually or by front loader).

Even when left running for a long time, there is no tendency towards separation or the formation of lumps. Mixing and unloading can be controlled automatically using a timer switch.

The soil mixer can also be used as a soil conveyor for the tray filler or as a filler machine.

Benefits

- » A homogenous mix is garneted even in the case of an extreme difference between the quantities of the mixing components
- » Mixing process won't change the structure of the substrate
- » Can be emptied completely
- » Can be used as an additional soil hopper and as a filling machine for containers or polybags
- » Open soil hopper can be filled from three sides
- » Loading can be done manually or by front loader
- » Duration of mixing procedure adjustable from 0.5 to 30 minutes

Key Features:

- Special mixing system with swivelling elevator, drive by means of an electric motor
- Automatic mixing and emptying by means of a timer (2 selectable speed levels) or direct feeding of a potting machine or tray filling machine

Technical Specifications:

Mixing Volume	1.3 yards ³	1 meter ³
Min. Dimensions	9'-10" x 5'-3" x 6'-7"	3 x 1.6 x 2 m
Max. Dimensions	11'-10" x 5'-3" x 7'-5"	3.6 x 1.6 x 2.25 m
Weight	1,873 lb	850 kg
Accessories	<ul style="list-style-type: none"> • Watering systems with ball valve /magnetic valve/ by means of a time relay • Heavy duty model for extreme soils with reinforced motor • Transport handle with wheels • Rear guide rollers (reinforced) • Set of soil deflector sheets • Emptying control (laser light sensor) • Emptying control via pedal switch 	

*Thanks to an extensive assortment of accessories, we can offer you customized solutions for your unique purposes. We look forward to your enquiries.

With over 20 years in the horticulture business, Bellpark Horticulture is a trusted name in Horticultural Automation Solutions. Serving growers in Canada and the United States, the Bellpark team strives to provide customers with the highest quality solutions.

Our sales and project consultants realize that each grower is different and that each project requires a personal level of attention to detail to ensure its success.

Our service team is committed to offering our customers the highest level of service with the quickest response time. With a dedicated parts and service department, our factory-trained technicians are available when you need them.

mayer

Since 1967 Mayer has been setting new standards in the green sector with their leading innovative automation solutions for ornamental plants and tree nurseries. They develop, produce and sell quality automation solutions for substrate preparation and for filling pots and trays.
