

## Machine Description

The Multi-Stack Tray Dispenser is a highly efficient solution for automatically dispensing shuttle trays, plug trays, and individual packs. These dispensers can function as independent units or be fully integrated into various types of production lines, enhancing workflow and productivity. This machine features automatic stack loading via an upper conveyor belt, with the dispensed trays returned on a lower belt, streamlining the entire process. Designed for versatility and ease of use; with adjustable settings to accommodate a wide range of tray sizes, this flexibility ensures that the dispensers can be adapted to various horticultural needs, providing a reliable and efficient solution for any growing operation.

## Features

- Variable Belt Speed
- Pre-wired for integration to flat filler or other production equipment
- Adjustable tray de-nester
- Electronic photo eye control

Specifications:	
Electrical Requirements	230VAC, 3 Phase, 3 Amps
Air Requirements	8 CFM / 100 PSI
Tray Size	Up to 24" Length and 16" Width
Production Speed	Up to 2,100 trays per hour
