

## Machine Description

The Single Stack Tray Dispenser automatically dispenses most common propagation and plug trays. It can be used as a stand-alone unit or can be fully integrated into production lines of all types. Up to an 18" tall stack of new trays are loaded into the magazine then trays are automatically separated and dispensed from the integrated conveyor belt. The dispensing magazine and separation mechanism are user-adjustable to accommodate different tray sizes.

## Features

- Variable Belt Speed
- Pre-wired for integration to flat filler or other production equipment
- Adjustable tray de-nester
- Electronic photo eye control

Specifications:	
Production Speed	Up to 910 trays per hour
Electrical Requirements	230 VAC, 3 Phase, 3 AMPS
Air Requirements	8 CFM at 100 PSI
