

## Machine Description

The Prins Tiger XL forklift stands out as a powerhouse in material handling, designed to deliver outstanding performance across various sectors including agriculture, warehousing, and manufacturing. This forklift is renowned for its unparalleled maneuverability and formidable lifting capacity, effortlessly managing loads of up to 1,800 kilograms. Its compact size is a key advantage, allowing it to navigate through confined spaces where conventional forklifts cannot reach. It is engineered for peak performance, and equipped with a robust engine that guarantees reliability and efficiency.

## Features

- Robust engine
- Unparalleled maneuverability
- Compact size to navigate confined spaces
- Intuitive operator interface
- Ergonomic Design

Specifications:	
Load Capacity	1000 to 1800 kg / 2204.6 to 3968.3 lbs
Fuel Type	Diesel, gas
