VERSION 003

VERSION 004

Specifications:

Cutting Width:
Standard up to 16" W
Optional up to 20" W

Cutting Height:
5" trimming per pass on
plants ranging from 1"-
24" tall

Electrical Requirements:
220 V 3 phase 18 A
220 V 1 phase 25 A

Dimensions:
Version 003
120"L x 55"W x 84" H
Version 004
120"L x 32"W x 96" H

Variable Speed Gardena
knives for soft plant material

Petunia Flats: Before

Petunia Flats: After

Industrial Shears for woody
stems and course plant material

Trimming machines provide growers with the opportunity to enhance crop development by means of "pinching" plants with minimal labor. The *Vacuum Trimmer's* unique combination of variable suction from above, variable directed air flow from below, variable scissor speed and variable throughput allows for tremendous flexibility - great for young plants and mature plants alike. After trimming, debris and clippings are drawn through indirect suction which facilitates reclamation of cuttings without damage. Machines are mobile and are available in single and three phase electricity. Options also include motorized vertical cutting head adjustment and knife configurations that are designed for specific plant types.
