

Climate Controls for Every Grower

One platform. Three systems. A clear path to scale.

FROM YOUR FIRST CONTROLLER TO YOUR ENTERPRISE BUILD

Priva isn't just for the top 100 growers.

Whether you're stepping into climate control for the first time or managing a multi-site operation, there's a Priva system built for where you are now and ready for where you're going. All three run on Priva One, so what your team learns today carries forward tomorrow.

ENTRY · GET STARTED

Compass

Climate, irrigation, and light, finally automated.

Up to 20 COMPARTMENTS

Built for small to mid-size operations stepping into climate control for the first time. Most growers managing with thermostats and timers don't realize how much of their operation they could be running from their phone. Compass puts the fundamentals into one system at a price point built for your operation.

- › **Climate, irrigation, and light** in one integrated system
- › **Remote control** from phone, tablet, or desktop
- › **Same Priva One platform** that scales up to Connex

MID-RANGE · COMPREHENSIVE

Compact CC

The bridge between entry-level and enterprise.

Up to 40 COMPARTMENTS

When basic controls aren't enough, Compact CC brings climate, irrigation, fertilizer dosing, light management, and analytics into one system. Modular by design, so you start with what you need today and add advanced modules as your operation grows.

- › **Fertilizer dosing** integrated with irrigation
- › **Water capture** and disinfection
- › **Historical analytics** via Priva Office Direct

ENTERPRISE · ADVANCED

Connex

The climate computer behind the world's largest operations.

Up to 250 COMPARTMENTS

When one greenhouse becomes many and one crop becomes many, you need a system that manages it all as one operation. Connex anticipates weather changes, manages the interdependencies between climate variables, and runs 24/7 without manual oversight.

- › **Crop-based steering** across compartments
- › **24-hr energy strategy**: Heat exchanger, hot water storage, heat pump
- › **Multi-site management** from one Priva One interface

System Comparison

Find the right Priva system for your operation, your budget, and your growth plan.

The Functionalities of Our Climate Computers

Every checkmark is a process your system can manage automatically.
