

RW-1000 vs RW-1500 vs RW-2100

Three transplanters, matched to your volume.

MACHINE BY MACHINE

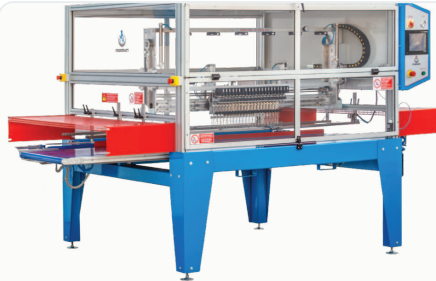

**RW-1000**

The entry point to automated transplanting.

- ✓ Up to 18,000 plugs/hr
- ✓ Up to 16 fingers
- ✓ 39 in (1,000 mm) planting spread
- ✓ Picks from 1 plug tray

IDEAL FOR

Smaller growers automating transplanting for the first time.

**RW-1500**

A step up in throughput and capacity.

- ✓ Up to 24,000 plugs/hr
- ✓ Up to 24 fingers
- ✓ 57.5 in (1,460 mm) planting spread
- ✓ Picks from 2 plug trays

IDEAL FOR

Mid-size operations scaling up output.

**RW-2100**

The highest-volume machine in the lineup.

- ✓ Up to 48,000 plugs/hr
- ✓ Up to 48 fingers
- ✓ 81 in (2,100 mm) planting spread
- ✓ Picks from 3 plug trays

IDEAL FOR

Large commercial growers running at high volume.

WHAT ALL THREE SHARE

- ✓ Pinching spade gripper, no push-up pins or tray mods
- ✓ Wireless gantry communication
- ✓ Graphical touchscreen control
- ✓ Electronic depth and tray-height settings
- ✓ Independent finger movement for selective picking
- ✓ Plants into the same trays and pots
- ✓ Handles 512 to 50 cell plugs
- ✓ 6 CFM air supply

Ready to take transplanting off your crew? **Your AdeptAg RSM can size an RW to your volume.**

Which RW Transplanter Fits Your Operation?

One operating model, three sizes, matched to your throughput.

HOW TO CHOOSE

All three RW transplanters pick from and plant into the same tray and pot formats, with the same pinching gripper and touchscreen control. The right one comes down to **how many plugs you need to move**. The RW-1000 for smaller growers, the RW-1500 for mid-size operations, the RW-2100 for large commercial production.

	RW-1000	RW-1500	RW-2100
THROUGHPUT	Up to 18,000/hr plugs	Up to 24,000/hr plugs	Up to 48,000/hr plugs
PICKING FINGERS	Up to 16	Up to 24	Up to 48
PLANTING SPREAD	39 in (1,000 mm)	57.5 in (1,460 mm)	81 in (2,100 mm)
PLUG TRAYS TO PULL OUT OF	1	2	3
POWER	230V 3-ph, 8A	230V 3-ph, 16A	230V 3-ph, 20A
FOOTPRINT (L×W×H)	16'6"×5'9"×6'6"	23'11"×5'8"×6'7"	25'10"×5'8"×6'7"
MACHINE WEIGHT	1,433 lb (650 kg)	1,653 lb (750 kg)	2,116 lb (960 kg)

Why growers automate transplanting

Transplanting is the slowest, most labor-heavy step between propagation and finished production, and the one hardest to staff at peak. An RW transplanter takes it off your crew and runs it at machine speed, with consistent placement that protects plant survival.

- ✓ **Cut labor at the bottleneck**, one machine replaces a hand-transplanting crew and frees people for QA and finishing.
- ✓ **Protect plant survival**, the pinching spade gripper places plugs accurately without push-up pins or tray mods.
- ✓ **Steady output all day**, consistent depth and spacing with no fatigue drop-off.
- ✓ **Less reliance on seasonal labor**, automate the step that is hardest to staff at peak.
- ✓ **One model to learn**, the same controls and gripper across the family, so you train once.
- ✓ **Scale without adding people**, take on more volume with the crew you already have.

Not sure which RW fits your line?

Your **AdeptAg RSM** can size the transplanter to your production volume and show how it integrates with your dibblers and fillers. Call **1-877-233-7824**.
